

Magnetic broom

Magnetic tool

The magnet broom with rubber wheels is used to comfortably collect metal parts. The collected parts are released from the magnets by pressing the lever on the plastic handle. The magnetic holding surface is 460 mm and is approximately 24 mm away from the ground. The grip height is 120 cm.

Features

- ✔ Ideal for collecting chips and small metal parts such as screws, nails, nuts, etc.
- ✔ Parts that are stuck are released by pressing the lever on the handle
- ✔ Ergonomic handle height
